SAJIN S

Business Analyst | Software Engineer | Healthcare IT Systems
sajinsuri@gmail.com | +91 82176 06773 | LinkedIn | Portfolio | Bengaluru, India

PROFESSIONAL SUMMARY

Business Analyst-oriented Software Engineer with 2+ years in healthcare IT, delivering enterprise Electronic Health Record (EHR) and Hospital ERP solutions across the full SDLC. Skilled in requirements elicitation, BRD/FRS documentation, gap analysis, requirements traceability and UAT coordination. Delivered an enterprise-wide audit trail and owned the Blood Bank module for a live client. MCA graduate with Agile delivery experience and strong SQL and REST API knowledge.

CORE COMPETENCIES

- **Business Analysis:** Requirements Elicitation, BRD, FRS, Gap Analysis, Feasibility Analysis, Requirements Traceability (RTM), User Stories, Acceptance Criteria, Process Improvement, Change Management, UAT Coordination
- **Methodologies:** SDLC, Agile, Sprint Planning Support, Stakeholder Management, Cross-Functional Collaboration
- **Data and Tools:** SQL, PostgreSQL, MongoDB, Microsoft Power BI (in progress), Postman, Git, GitHub, Cypress, Jenkins (CI/CD basics)
- **Technical:** Java, Python, Angular, JavaScript, HTML5, CSS, Bootstrap, REST API Design
- **AI-Assisted Delivery:** GitHub Copilot, Claude, Prompt Engineering, Workflow Automation
- **Domain:** Electronic Health Records (EHR), Hospital ERP, Blood Bank, CSSD, Audit and Compliance

PROFESSIONAL EXPERIENCE

Software Engineer — dWise Healthcare IT Solutions Pvt. Ltd.

Aug 2024 – Present

Healthcare Enterprise Applications (EHR & Hospital ERP)

- Owned feature delivery across the SDLC, from requirement analysis and solution design to testing, deployment and post-release support, for EHR and Hospital ERP modules.
- Translated business problems from stakeholders into clear functional and technical requirement documents, working with QA and DevOps to deliver on time and within scope.
- Validated 30+ change requests against approved requirements across weekly releases, catching deviations before UAT and reducing rework.
- Designed and optimized REST APIs (Java backend, Angular front end) enabling data exchange between hospital systems.
- Used GitHub Copilot and Claude to generate 100+ test cases and draft requirement documents, cutting preparation time by roughly 30–40%.

Blood Bank Management System — Module Owner

- Led the maintenance and enhancement life cycle of the module for a live client as sole owner, from requirements to deployment.
- Gathered requirements from blood bank staff and internal teams through regular sessions, documenting 20+ functional Requirements and change requests that were successfully deployed.
- Maintained full traceability of change requests and validated each implementation before successful deployment.
- Coordinated requirement validation, deployment support and continuous improvement with cross-functional teams.

Audit Module — Individual Contributor

- Analyzed compliance and data-governance needs and designed an application-wide audit trail so every transaction can be traced.
- Captured the user, timestamp, action performed, and record- and field-level before/after values for every operation in every module.
- Gave administrators and the business a reliable change history for accountability, issue investigation and internal audit review across 15 modules.
- Strengthened data integrity and traceability without disrupting existing workflows.

CSSD Module — Enhancement :

- Currently enhancing the Central Sterile Services Department (CSSD) module, covering the sterilization and disinfection lifecycle of surgical and other instruments from issue through receipt back to CSSD for further processing.
- Delivering related inventory transaction tracking, ledger management, and stock balance reporting functionality.

EDUCATION

- **Master of Computer Applications (MCA)** — Presidency College | 2024
- **Bachelor of Computer Applications (BCA)** — AIMS Institute | 2022

CERTIFICATIONS

- The Bits and Bytes of Computer Networking — **Coursera**
- SQL Course — **SoloLearn**
- Data Science 101 — **IBM**
- Google Analytics for Beginners — **Google**
- Web Development (HTML, CSS, JavaScript) — **Digital Ada**
- Microsoft Power BI for Business Intelligence — **Udemy** (In Progress)
